Thank you for purchasing FrSky SBUS to CPPM Converter. This product can convert SBUS signal into CPPM. In order to fully enjoy the benefits of this system, please, carefully read the instruction and set up the devices as described below.

1. Connect the servo and battery connector in the correct polarity. Connecting the power + and – polarities in reverse by mistake may cause smoke, fire, and damage.

2. Do not disassemble or modify the product. FrSky will not be responsible for disassembly or modification other than those specified by us.

3. Do not connect any other device (gyro, battery, etc.) other than FlyController to the CPPM output port of converter. There is the danger of erroneous operation or damage.

FrSky Electronic Co., Ltd will not be responsible for damage caused by combination with other than FrSky Genuine parts.

### Specifications

- **Total Length**: 360mm
- **Weight**: 14.9g
- **Operating Voltage**: DC 4-10V
- **Precision**: 0.615μs

**WARNING**

The input current should match the converter’s proper operating condition. There is the danger of erroneous operation or damage.

### Warning

Failure to follow these safety precautions may result in severe injury to yourself and others.

- Ensure that the unit is mounted in an area that will eliminate exposure to fuel, water and vibration.
- Ensure that the unit is connected properly to the receiver. Failure to do so could result in damage to the unit.
- To ensure that the unit is mounted properly. Failure to do so could result in damage to the unit.
- Do not fly until inspection is complete.
