

Introduction

Thank you for purchasing FrSky Li-Po Voltage Sensor. It is designed for FrSky Smart Port enabled system, and can measure cell Voltages as connected. There're two versions, one with a screen and the other without it. In order to fully enjoy the benefit of it, please read the instruction manual carefully and set up the device as described below.

Note: All instructions, warranties and other collateral documents are subject to change at the sole discretion of FrSky Electronic Co., Ltd. For further information, please visit www.frsky-rc.com and click the support tab for this product.

Overview

Specifications

- Dimension (L*W*H) :
 - 52*23.5*9.5mm (with screen)
 - 52*23.5*5.7mm (without screen)
- Weight:
 - 7.5g (with screen)
 - 5.3g (without screen)
- Measurement range: 2S~8S
- Power consumption (S.Port): 10mA@5V
- Power consumption (battery): 10mA
- Voltage display resolution: 0.01V (Only for FLVS with screen)
- Voltage detection precision: 0.05V
- Operating temperature: -20~60°C
- 128*64 OLED Screen (Only for FLVS with screen)
- Compatible with FBUS/S.Port protocol

Set Up

FrSky Li-Po Voltage Sensor is only compatible with FrSky Smart Port enabled receivers. Here we take the setup together with X8R receiver for example. For more details, please refer to corresponding receiver instruction manual.

Warning: Install FrSky Li-Po Voltage Sensor on any appropriate surface of the airframe that stays away from water, vibration, or fuel.

ID Set Up

Each type of FrSky Smart Port enabled sensor has its unique physical ID. The ID number could be changed by ETHOS or FreeLink App.

Note: All FrSky Smart Port enabled sensors could daisy chain with each other through their Smart Port.

LED Status

LED Status	S.Port	FBUS
Flash slowly	YES	NO
Flash quickly	NO	YES
