

Overview

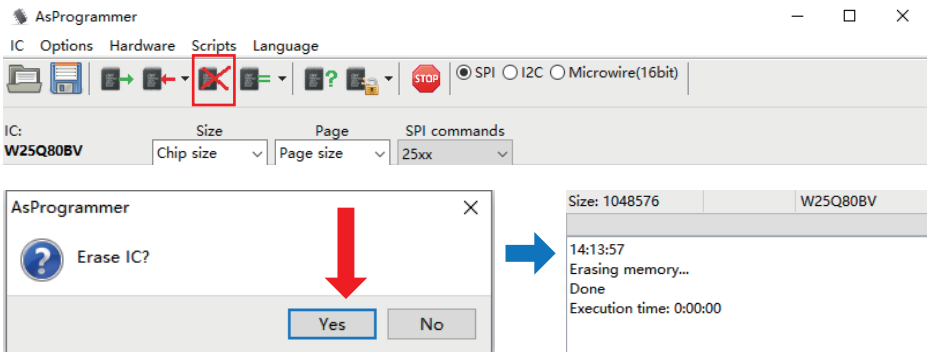

How to flash the firmware for the HDZero VTXs on PC

1. Connect the upgrade tool to the HDZero VTX by an attached cable. Open the program and follow the steps below to select the corresponding chip model, then click the icon of [Read IC].

[IC] > [SPI] > [WINDBOND] > [W25Q80BV]

2. Click the [Erase IC] icon and select [YES] to wait for the finish of the erase processing.

3. By clicking the [Open] icon to open the file, select the downloaded firmware of the HDZero VTX, click [Program IC], and then [YES] to start the program processing. The prompt bar appears means the firmware upgrade is completed.
